

# MetaClinic vs. In-Network Visits

With your Guaranteed Cost-Per-Visit (CPV), every primary care visit your members make saves you money. In the example below, this current MetaClinic client has a Guaranteed CPV of \$222/visit. At the end of 2020, their CPV was calculated to be \$206/visit. This resulted in a **savings of \$163/visit** compared with their in-network visit costs. Even as a hybrid (some members still going to in-network doctors) the average CPV came down to \$277/visit, for a **savings of 91.05 for EVERY primary care visit.**
